## Skills

**Frontend:** JavaScript, Bootstrap, ReactStrap, React, Redux, EJS, jQuery, ES6, HTML, CSS

**Backend:** Python, Node.js

**Database:** MongoDB, Mongoose, PostgreSQL, Sequelize ORM

**Tools:** Materialize, Auth, Phaser.io, RESTful routing

## Education

**Software Immersive Bootcamp, General Assembly, Seattle**

**March - June 2019**

- Three month full stack web development course where I built interactive web applications as well as building foundation in data structures and algorithms.
- Concentrated focus on MERN stack with an emphasis on frontend development

**Western Washington University**

**Bachelor of Arts, International Business Administration**

**Minor in Economics**

**Immersive Study Abroad - Asia University, Japan**

**Mar 2014 - Jan 2015**

- Passed business courses solely taught in Japanese.

## Projects

**Shappit** - A barge line order placement and tracking web app.

- Auth-protected end-to-end service for tracking orders.
- Django backend with PostgreSQL database and a decoupled Django frontend

**Kero** - Task Management web app

- Implemented an intuitive UI to allow users to manage tasks seamlessly
- Implemented multi-user operation and collaboration on tasks
- Mongoose ORM interfacing with MongoDB with a React frontend using ReactRouter

**Pokemon Party Planner** - Detailed roster organizing web application

- Node.js backend with Express and EJS
- Sequelize ORM interfacing with PostgreSQL database
- Data-driven team overview pages for quick analysis
- JavaScript enabled responsive UI for grab-and-go strategies

## Work

**Customer Service Representative - Alaska Marine Lines, Mar 2016 - Mar 2019**

- Provided creative solutions to customer problems on and behind frontlines
- Prevented service failure through detail orientation and process improvement

**Customer Service Representative - Parker Staffing, Nov 2015 - Feb 2016**

- Leveraged people skills to creatively address customer issues timely and efficiently

**Market/Marketing Research - Ebe Farms, Jan 2014 - Mar 2014**

- Identified key local markets into which Ebe Farms would be able to introduce it's products after metrics based analysis of county demographics and sales data

**Webmaster - WWU International Business Network Club**

- Managed and updated the club's website and was also in charge of social media.
